EDUCATIONAL BACKGROUND

Bachelor of Advanced Computing (Hons)

University of Sydney, AU | July 2024

First Class Honours

Major: Data Science | Minor: Cognitive Psychology

International Baccalaureate Diploma Programme (IBDP)

Neerja Modi School | May 2020

Graduated with STEM honours award, Distinction Diploma score of 41/45

RECENT PROJECTS

MASCoT: Multi-Aspect Sentiment Analysis using Contrastive Learning and Temporal Insights

Honours | June 2023 - Present

- Developed an NLP sentiment analysis system using BERT and contrastive learning, achieving 87% accuracy in multi-aspect classification
- Scored Honours Class I (HD). Currently preparing research for publication.

StemLook CRM & Enrollment Management Platform

Internal Project | March 2024 - Present

- Developed a scalable CRM solution that automated high-volume data workflows for enrollment and communications, demonstrating an ability to engineer efficient backend systems.
- Utilized Docker and Kubernetes for application deployment.

University of Sydney Honours graduate with a Major in Computational Data Science, specializing in **scalable distributed systems**, **DevOps**, and backend engineering. Experienced software engineer proficient in **Golang**, **CI/CD** implementation, and **infrastructure-as-code**. My expertise lies in building performant and secure microservices, with hands-on experience in **deployment automation** and **improving system efficiency**.

WORK EXPERIENCE

DevOps Engineer: Full Time

Sonic Healthcare | May 2022 - Present

- Implemented Kong API Gateway for API management, integrated Snyk and SonarQube for vulnerability scanning and enhancing security across the organization's microservices
- Co-developed SPOCK backend system tracking developer availability, task estimation, and prioritization, improving delivery timelines
- Developed a custom Golang automation templating tool for Ansible, Azure DevOps, and Tanzu configs, streamlining CI/CD pipelines for multi-stage deployments to increase consistency and reliability across projects in sonic ecosystem.

Technical & Location Manager

StemLook | Jan 2022 - Present

- Architected and developed a comprehensive STEM curriculum for Python and Java, demonstrating the ability to design and structure technical systems and educational programs.
- Managed operational workflows and staff for three education centers, highlighting experience in overseeing and streamlining a business's technical and logistical operations.

SKILLS AND PROFICIENCIES

Programming Languages

- Golang, Python, Java, SQL, R, YAML, JavaScript

Frameworks & Technologies

- DevOps: AWS, Azure DevOps, Ansible, Octopus Deploy, CI/CD, Kubernetes, Docker
- Security: Snyk, SonarQube, Kong API Gateway
- AI/ML: TensorFlow, Keras, PyTorch, scikit-learn, NLP, Deep Learning

Certifications

- CKA: Certified kubernetes administrator
- AWS Solutions Architect: Test in Dec'25
